

Technical Data Sheet

PRODUCT	COSMOS LAC Prefilled Spray 030
DESCRIPTION/USES	Professional spray filled with solvents and propellant. Special automotive, solvent based coating is added by a professional. Ideal for spot repairs or refinishing parts. Special- adjustable actuator.
VOC content	810g/L (20 °C) EU limit for the product (Cat. B.E): 840 g/L (2010)
Flash Point	-104 °C (based on propellant)
Drying time	The drying time depends on surrounding temperature, air humidity, thickness of the applied coat and the filled type of paint
Color	Depending on filling
Can Pressure	4bar (20 oC) , 8 bar (50 oC)
Contents	400ml
Application	Remove all dust, rust and oil from the surface. Protect the area which you don't want to be painted. Shake the can thoroughly and spray at a distance of 30cm from the surface. Try the spray on testing surface. Apply in several thin layers. For better results apply 2-3 thin coats, 3-5 min apart. Best application temperature : 20 oC - 25 oC
After use	Spray holding the can inverted for 3". Clean the caps with solvent. The storage stability of filled cans depends on the added paint
Storage	5-35°C. Do not put in vehicles.
