

TECHNICAL DATA SHEET

Anti-fog nitro thinner

Product description:

Formulated with high selected raw materials, it is used for professional dilution of primers, nitro gloss and matt finishes. Its strong solvent power improves the wettability properties, in order to get the perfect softness, brightness and performance of the paint.

Operating instructions:

Pour it into the product you need to dilute, according to the usage percentages suggested by the manufacturer. It is recommended a gradual pouring and mixing, in order to get the perfect uniformity of the diluted product. After usage, close the case tightly. Keep it away from children and heat sources.

Advices

It is recommended to do a preliminary test before using the product. Use it according to the right work rules. Avoid release of the product and/or its packaging to the environment.

Chemical and physical characteristics

Aspect: colourless

Odour: aromatic

Boiling point: 60°C – 140°C

Flashpoint: < 21° C

Density: approximately 0.87 +/- 0.01 g/mL

Solubility: partial in water

Delivery:

200 lt metallic drums

25 lt metallic drums

1 lt, 5 lt, metallic cans
